

Maximum Controllability

ELEKTRALITE
division of group one

CP16 / 24 – designed to control large channel fixtures *effortlessly*

- ★ CP16 / 24 will control any DMX512 fixture up to 24 channels
- ★ CP16 / 24 will control up to 16 fixtures
- ★ CP16 / 24 has an extensive fixture library – patched and ready for use

Works with these fixtures and others:

Elektralite my250, my250w, my575.2, my575w and Paintcan

Martin MAC 250, 300, 500, 600 and 2000

High End Studio Spot CYM, Studio Color and Studio Beam

- ★ Easy programming - takes just seconds to program a cue, chase or macro
- ★ Manual control of individual or multiple fixtures
- ★ Absolute or relative positioning
- ★ Auto playback on power-up option ~ ideal for display work
- ★ Auto masking
- ★ Timed crossfades
- ★ MIDI connectivity
- ★ Link CP10xt's together
- ★ Link CP16 / 24's together
- ★ External floppy disk drive option
- ★ External 115 volt or 230 volt UL Listed / CSA Approved power supply

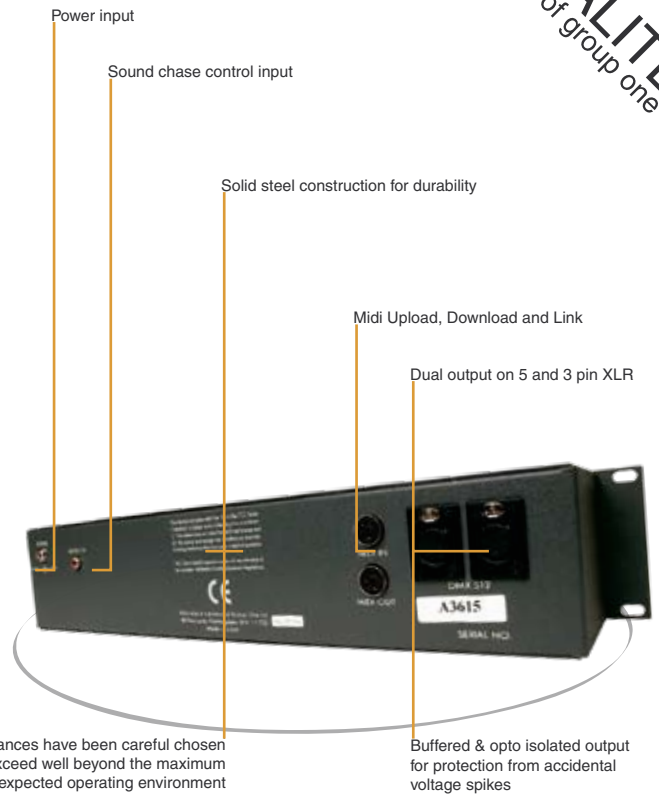

Specifications

CP16 / 24

CP10xt

• Number of DMX channels.	384	128
• Midi Upload, Download and Link.	★	★
• Number of programmable cues.	225	600
• 99 chases each with up to 99 programmable steps	★	★
• 50 programmable macros	★	★
• Sound chase control input	★	★
• Non-volatile memory	★	★
